1
Go to the *Birds* gallery.

The shape of a bird's beak is a clue to what it eats. It would be no good having a small, thin beak if you need to hold down prey and tear flesh.

2
Look around the gallery at the different beak shapes. Can you guess what birds the following beaks belong to?

This bird is a predator. It uses its beak to tear meat.

This beak belongs to a:

This bird sucks up nectar from deep inside flowers.

This beak belongs to a:

Choose a beak of your own to draw.

This beak belongs to a:

3
Choose one of the beaks. **Ring round** the words that best describe it.

My chosen beak belongs to a:

--	--	--	--	--	--	--	--	--	--

strong	delicate	pointed	hooked
straight	curved	short	
long	sharp	blunt	rounded

4
There are some other strange beaks on display. What are these two birds called?

What is special about me? **Talk** about it with your partner.
