Creepy crawlies
Beat the bug puzzle

Research challenge

1 Find the TV screen near the entrance.

2 Watch the video, then look at the boards under the screen to answer the following questions.

3 What is the proper name for creepy crawlies?

[illegible]

4 They can be split into four groups. **Write them down.**

4

5

4

5 What are the main features of each group? **Talk** about them with your partner.

6 Find the Building at the seams display.

Arthropods have a hard skeleton on the outside of their bodies (exoskeleton).

Imagine having your skeleton on the outside of your body

7 Why does the crab have to shed its skeleton?

Did you know?

A fully grown Japanese spider crab has a leg span of almost four metres.
