Prey survival challenge

1
Find an **artiodactyl** in the
room with the blue whale.

'Art-eo-dac-tils' are
mammals that have
hooves with an even
number of toes on
each foot. Gazelles,
deer, hippos and
camels are artiodactyls.

Did you know?

Lots of artiodactyls are
prey animals. Predators
such as lions hunt them.
Their bodies are built to
help them survive and
keep them from
being eaten.

2
Choose an artiodactyl and
sketch it. Then **complete**
the boxes to explain how
it tries to keep safe from
predators. **Talk** about your
findings with your partner
or group.

My artiodactyl is:

I keep safe by:

having eyes on the side
of my head

so I can:

I keep safe by:

having a camouflaged coat

so I can:

I keep safe by:

so I can:
